Education

- **FAST NUCES** Lahore, Pakistan
BS in Computer Science; CGPA: 3.0 *August 2022 – May 2026*

Experience

- **Bookme.pk** Lahore, Pakistan
Software Engineer (Part-Time) *Aug 2025 – Dec 2025*
 - **International Product Launch – Saudi Arabia:** Contributed to the frontend development of Bookme's main web and mobile platform to support the company's expansion into the Saudi Arabia market, helping deliver production-ready features under tight deadlines.
 - **Core Product Development:** Built and maintained critical user-facing components for the Bookme app and website using modern JavaScript frameworks, ensuring responsive design and cross-platform compatibility.
 - **Cross-functional Collaboration:** Worked closely with UI/UX designers and backend engineers to translate Figma designs and REST APIs into clean, scalable frontend modules.
 - **Code Quality Improvements:** Refactored legacy components to improve performance, maintainability, and reduce UI defects in the production environment.
 - **Tech Stack::** Vue.js, Nuxt.js, JavaScript, REST APIs, Git
- **Bookme.pk** Lahore, Pakistan
Frontend Developer Intern *June 2025 – Aug 2025*
 - **Back-Office Portal Development:** Worked on the company's internal Back-Office Admin Portal using Nuxt.js, supporting daily operational workflows including booking management and content administration.
 - **Reusable UI Components:** Developed reusable Vue/Nuxt components to standardize UI behavior across the admin system and improve development speed.
 - **API Integration:** Integrated RESTful APIs to enable real-time data rendering and admin-side validation workflows.
 - **Professional Growth:** Gained hands-on experience with production codebases, Git version control, agile practices, and was promoted to part-time Software Engineer after successful internship completion.
 - **Tech Stack::** Nuxt.js, Vue.js, JavaScript, Tailwind CSS, REST APIs, Git

Projects

- **Git Hero – Interactive Git Learning Platform**
Live | GitHub
 - : Built a gamified learning platform to teach Git through real-world scenarios and hands-on challenges, featuring Git Panic Mode and a Visual Repository Simulator.
- **SaadDocs – Real-Time Collaborative Editor**
Live | GitHub
 - : Built a Google Docs-like editor using Next.js 15, React, TipTap and Liveblocks for real-time multi-user collaboration. Deployed on Vercel with low-latency syncing and rich-text editing features.
- **IdeaFusion – Collaborative Whiteboard Platform**
Demo | GitHub
 - : Developed a team ideation web app using Next.js, Convex, Kinde, ShadCN and Excalidraw API, enabling live text editing and sketching on a shared canvas for brainstorming sessions.

Skills

- **Proficient:** JavaScript (ES6+), TypeScript, Node.js, React.js, Next.js, Vue.js, Nuxt.js, tailwind, REST APIs, Data Structures & Algorithms, PostgreSQL, MongoDB
- **Familiar / Comfortable:** Python, Redis, django, Docker, Prisma
- **AI / ML:** NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch (basics), Machine Learning concepts, Predictive Modeling, Data Analysis
- **Tools & Platforms:** VS Code, git, Vercel, Figma, Postman, Convex, ShadCN, Liveblocks, Excalidraw API
